

## Sirius *LITE*

**The industry's easiest to implement  
and most cost-effective rental software**

**Sirius LITE** is a complete rental & inventory management software solution that offers many of the same important features as its bigger brother, the industry renowned **Sirius PRO Rental & Inventory Management** software, but the **LITE** version focuses on the main aspects of rental management, which are quotations, reservations, contract management & invoicing, accounts receivable and inventory control. This simpler program is a tried and true product and is easier than ever to install, learn and use, at an unbeatable price point that is attractive to smaller rental operations.

Moreover, Orion Software has developed an outstanding auto-learn technology that will allow for a completely self-sufficient implementation, at a total cost of ownership that has never before been seen in the rental industry.

➤ **Maximize the efficiency of your business**

Find out how **Sirius LITE** will manage all the customer operations of your business, including quotations, reservations, invoices, and accounts receivable. One simple operation will generate a rental contract, calculate the rental rate, allow you to see the current account information and allow you to print a statement of account.

➤ **Provide first-class customer service**

Benefit from real-time availability via a simple, color-coded calendar and automatically print security and equipment usage instructions on your contracts

➤ **Improve your accounting controls**

Learn how **Sirius LITE** will track your accounts receivable effectively by monitoring overdue payments, blocking delinquent accounts, and processing payments efficiently, thereby improving your cash flow and enhancing your credit controls.

## ➤ Enhance your inventory management

Designed with your inventory management in mind, **Sirius LITE** will manage your inventory through all aspects of your business by tracking all equipment rentals and accessory sales. Precise, real-time information on your inventory levels and availability are at your fingertips.

## Sirius LITE Features

### Customer Operations

- **Quotations/Reservations/Rental Contracts/Invoices**

Provides detailed quotes and reservations to your customers and converts them to rental contracts and invoices without re-entering the information, saving both time and money while insuring accuracy.

- **Flexible Rate Calculation and Invoicing Processes**

Calculates rates on hourly, daily, monthly, yearly basis and maximizes your revenue with accurate and fast invoicing. **Sirius LITE** also produces invoices on a transactional basis or periodic basis.

### Inventory Management

- **Equipment and Product Sales**

Easily manage the sale of products including both new and used equipment with **Sirius LITE**.

- **Equipment Reservation and Quotations**

Keeps track of all your reservations in order to provide, on demand, a list of available equipment for any period and to avoid double bookings.

- **Kit and Accessory Management**

Automatically links the proper items to your kits, and matches the proper accessories to your products in order to prevent oversights and lost add-on sales.

## **Reporting**

Over 100 reports available to help you manage and better understand your operations including:

- Best Renters
  - Upcoming Reservations
  - Late Contracts
  - Rental List Conflicts
  - Transaction History
  - Price Lists
  - Inventory Lists
  - Statistical analysis
- And many more.....

## **Accounting**

- **Credit Limits**

**Sirius LITE** monitors and tracks credit limits and credit standings of customers, limiting the extension of credit to customers who have overdue bills or who are over their credit limit.

- **Statement of Accounts**

Benefit from detailed histories and statements of accounts of customers that can be printed or faxed (using a standard fax management software).

- **Accounting Links**

Easily integrates with major accounting software programs including QuickBooks, Peachtree and Simply Accounting.

## **History**

- **Customer History**

View a complete detailed customer history with full transaction listings. This allows you to know what your customers are renting currently, what they rented in the past and how much money they owe.

- **Review Transaction**

Review and quick zoom to a transaction quickly and effectively. Reprint the invoice at any time.

## Technology

Developed using an open architecture and using Microsoft technology, **Sirius LITE** has evolved into a robust, integrated and easy to implement rental software solution that runs seamlessly in Windows 98SE, NT, 2000, XP Pro, Vista & Server. Installation is rapid and intuitive:

- insert **Sirius LITE** CD-ROM, and the system will install automatically
- follow **Sirius LITE** tutorials, and experience the features at your own pace by moving through the multimedia slideshow.

## Compatibility

Both **PRO** and **LITE** versions are fully compatible with each other. Choose the solution that works best for you and your budget. You can start using the **LITE** version, and as your business needs grow you can easily upgrade to the **PRO** version .
