CRM

The CRM module manages all aspects of your customer relationships. From the initial discussion to the rental contract, you can document and get a complete view of every interaction between you and your customer. The CRM module is completely flexible and versatile. Grow your business and improve your customer satisfaction with an integrated CRM module.

Distribution

Our distribution module is an integrated solution for users reselling equipment, engaging in sub-rentals or transferring equipment between branches. This module will help you manage back-orders, drop-shipments, create sub-rental POs and manage your sub-rental margins. The distribution module offers an integrated view of all equipment transfers with other branches and third party suppliers. Distribution is a user-friendly module including availability to ensure equipment is on-hand wherever and whenever it is needed.

Preventive Maintenance

Increase your equipment usage and reduce downtime with the Preventive Maintenance module. Preventive Maintenance enables you to manage equipment maintenance schedules, assign and track staffing, automatically create itemized work orders and maintain a detailed history of all maintenance activities. Our intuitive maintenance module automates your repairs and even sends a maintenance reminder based on projected equipment usage.

Multi-Location

Our Multi-location module will instantly connect you to multiple branch offices or warehouses. Remote branches can connect to a central server, enabling you to book jobs, quotes, crew, and even run reports by location.

Service Management

The Service Management Module is an integrated solution designed to manage your services efficiently. Manage deliveries and pick-up, allocate employees to transactions or work orders and keep track of employee timetables. Access the Staff Allocation panel and view staff availability and automatically send status e-mails with daily or weekly schedules.
